ADA Restriping Parking Lots

Information about how to create accessible car and van spaces and how many spaces to provide when parking lots are restriped as required by the ADA.

Accessible Parking Spaces

When a business restripes a parking lot, it must provide accessible parking spaces as required by the ADA Standards for Accessible Design.

In addition, businesses or privately owned facilities that provide goods or services to the public have a continuing ADA obligation to remove barriers to access in existing parking lots when it is readily achievable to do so. Because restriping is relatively inexpensive, it is readily achievable in most cases.

This ADA Business Brief provides key information about how to create accessible car and van spaces and how many spaces to provide when parking lots are restriped.
