Automotive – 2026 Annual Safety Training Plan

If you’re running a business in the automotive industry, it’s your responsibility to provide your employees with a safe workplace, free from any hazards or health risks. As an employer, you also need to make sure you’re compliant with relevant safety laws and regulations for the industry. That means providing appropriate safety training for all staff.

Training topics also include those relevant to all industries that ensure safe work environments and healthy workers such as anti-harassment training and emergency response. These materials educate, inform and inspire better workplaces for all companies.

Download our OHS training calendar as selected by ASSE certified trainers. You can use this calendar to access both online and instructor-led safety training for each month.
