Business Services – 2026 Annual Safety Training Plan

Although you can’t prevent every injury from happening (because, let’s face it, we are all human and accidents do happen), you can take proactive measures to lessen the risk of work-related injury or death. One of the most effective steps you can take is to conduct thorough on-the-job safety training. Business services, although not comparable to construction and oil & gas, for accidents and incidents – does account for a large percentage of annual workplace accidents and costs.

Training topics also include those relevant to all industries that ensure safe work environments and healthy workers such as anti-harassment training and emergency response. These materials educate, inform and inspire better workplaces for all companies.

Download our OHS training calendar as selected by ASSE certified trainers. You can use this calendar to access both online and instructor-led safety training for each month.
