

Confined Spaces Permit Required – Landscaping Infographic

CONFINED SPACE SAFETY TIPS

- ✓ **Use a Properly Calibrated Gas Detector.** Going on-site with a properly calibrated gas detector ensures your device can measure noxious gases.
- ✓ **Properly Ventilate.** If a gas detector alerts to high levels of toxic gas (or a low level of oxygen), workers need to address this quickly.
- ✓ **Have an Escape Route and Rescue Plan.**

An illustration of a worker wearing a hard hat and a gas mask, standing inside a circular opening in the ground. A gas detector is attached to the worker's belt. A warning sign is visible on the right side of the opening. The sign is white with a black border and contains the text: "DANGER", "CONFINED SPACE", and "ENTRY BY PERMIT ONLY". The background is dark gray with black and white diagonal stripes at the top and bottom.
