

Cybersecurity – Email Threats Unmasked (Spanish)

Course Description

This course will dive into the surprising ways a single email can cost an organization millions, lock down critical systems, or even leak sensitive data. This course will arm you with simple, everyday habits that keep you—and your company—safe. You'll hear true stories, learn why over 90% of cyber-attacks start in the inbox, and practice quick checks you can do before ever hitting "Open." (Spanish Version)
