

How to Conduct A Better OHS Audit

Recorded Date: Jan 29, 2025

Speakers: Daniel Clark, Founder & President, Clark Health and Safety Ltd.

About This Webinar

Join us for a practical and actionable session on improving Occupational Health and Safety (OHS) audits. This webinar, led by Daniel Clark, founder and President of Clark Health and Safety Ltd., will cover:

- **Effective Audit Techniques:** Step-by-step guidance for conducting thorough and efficient audits.
- **Hazard Identification and Mitigation:** Tools and strategies to detect and address workplace risks.
- **Compliance Essentials:** How to align audits with current laws and industry standards.
- **Continuous Improvement:** Proven methods to enhance safety performance and organizational success.

This session is designed to provide you with the insights and tools you need to make your OHS audits more impactful and compliant. Don't miss the chance to learn from an industry expert!

About the Speaker

Daniel Clark, BSc., CRSP, NCSO, CQIA, is the founder and President of Clark Health and Safety Ltd., a Calgary-based firm specializing in safety and quality management system consulting.

With over a decade of experience, Daniel has collaborated with organizations across various industries, including energy, engineering services, restoration, industrial trades, and manufacturing, to develop and enhance their Occupational Health and Safety (OHS) and quality management systems. His expertise encompasses guiding companies toward ISO 9001 and 45001 certifications, COR certification, and registry compliance, as well as conducting comprehensive audits and providing tailored training programs.

He holds professional designations as a Canadian Registered Safety Professional (CRSP), National Construction Safety Officer (NCSO), and Certified Quality

Improvement Associate (CQIA).
