Join Honeywell's respiratory technical leader Derek Turner (QSSP, OSHA 30) and his team for an overview on common gaps in high risk respiratory programs, reasons why they happen & how to prevent them.

This session is appropriate for organizations focused on respiratory safety due to chemical, vapor, atmospheric or environmental threats. With more than 25 years experience in chemical manufacturing and safety, Derek will reveal the most common areas requiring vigilance in this power packed 30 minute session.
