

MMH – Work Space Layout Fact Sheet

WHAT ARE SOME IMPORTANT ELEMENTS OF A WORKPLACE LAYOUT?

Layout or organization of the work area which allows materials to be handled without excessive bending, twisting and stretching reduces injuries.

- Have all materials at work level.
- Use adjustable elements at the workplace.

Workbench with adjustable height and tilt improves working position.

Self-adjusting platform automatically matches worker's height.

- Ensure that there is enough room to turn around to prevent twisting.

- Use adjustable supports or suspenders to operate heavy tools.

Tool suspender reduces muscular effort and compression on the back.

Tool support eliminates over-stretching and overreaching.

- Use bins that allow easy access.

Lift-and-tilt device and side opening on bin reduces bending.
