Online Safety Training Made Simple

Providing quality safety training shouldn’t be complicated. With Online Training in the Safety Center, policyholders can quickly assign courses, monitor learner progress, and access reporting tools, all from one convenient platform.

Whether you’re training new employees, reinforcing workplace safety practices, or tracking completion rates, Online Training helps streamline the process from start to finish.

What You Can Do

- Access a library of online safety courses
- Assign training to individual learners or groups
- Automatically notify employees of new assignments
- Track participation and course completion
- Run reports and view training analytics
- Manage users and account settings

The platform is designed to make safety training easy for administrators while providing learners with on-demand access to their assigned courses.

To help you get started, we’ve included step-by-step videos and written instructions covering everything from assigning courses to using analytics and managing your account.

Get Started Today

Explore the Online Training platform through the Safety Center and discover how easy it is to deliver, manage, and measure employee training.

Frequently Asked Questions

How do I access Online Training?

You can access Online Training through the Safety Center by selecting My Training from the top navigation menu or by choosing Assign Now from an eligible course page.

How do I assign a course?

Administrators can search the training library, select a course, and add learners directly from the course details page.

Will learners be notified when training is assigned?

Yes. Learners with an email address on file will receive an email notification when training is assigned.

What if a learner does not have an email address?

Assigned training will still appear in the learner's learning library when they log in to the platform.

Can I track completion and progress?

Yes. The Analytics dashboard provides visibility into enrollments, completion rates, overdue training, learner activity, and more.

Can I export reports?

Yes. Analytics reports can be exported, and many reports can be scheduled for automatic delivery.

Can I assign training to multiple employees?

Yes. Training can be assigned to individual learners or groups, helping administrators efficiently manage training across their organization.

Where can I get help?

If you need assistance with course assignments, reporting or account management, customer support is available to help.
