Trailer Checklist

Best practice checklist for any trailer or load being towed.

- Do not overload. Stay within your Gross Vehicle Weight Rating (GVWR) capacity.
- Follow the axle manufacturer’s recommendations for checking lug nuts on wheels.
- If the trailer has been idle for several months, grease the bearings
- Keep tires inflated per the PSI listed on the sidewall of the tire.
- Scale your trailer after it is loaded to make sure it does not exceed the GVWR. Make sure the hitch weight is…
